

To test your game design you need to have be on a desktop with Chrome installed and “Web Server for Chrome”

Video tutorial here: <https://www.youtube.com/watch?v=AK6swHiPtew>

Be sure to choose the folder that contains your games index.html file (*flappy*)

To test your game you can now click the link (usually a string of numbers) under the heading **Web Server URL(s)**

You can edit the graphic by replacing files in (*flappy/assets/img/*) - either match the exact dimensions and file formats or edit the code

You can edit the game code in (*flappy/js/game.js*)
